ABOUT FIRE-ESCAPES.

Somebody Fighting Against Their Adoption by Congress-Who is It?
The recent fire at the shaky old Chronicle build-

Ing has drawn the attention of the District author-illes and Congress to the urgent need of fit es-capes on the public buildings of the city. Had it not been for the fire-escape in the rear of the Conot been for the fire-escape in the rear of the Co-lumbian Bank-Note Company's building, upon which Chief Engineer Cronin and others reached the roof of the burning building, the destruction of property there would have been more complete. Recently, upon the motion of senator Gorman, the following amendment was unanimously recom-mended by the committee to be inserted in the regular appropriation bill for the District of Co-lumbia,

NOW PENDING IN CONGRESS:

"SECTION —. For the purchase and erection of authable fire-e-capes for the public schools and other District buildings, \$50,000 or so much thereof as may be necessary; said fire-escapes to be selected and erected upon the recommendation of the president of the Baard of Commissioners for the District of Colombis, the Architect of the Capitol, and the Chief Engineer of the Fire Department." This is an eminently proper section, and one to which there cannot be any reasonable objection. The members of the barrd designated comprise in themselves every element necessary for a faithful and intelligent performance of the most important duty imposed on them.

CHIEF ENGINEER CRONIN, NOW PENDING IN CONGRESS

CHIEF ENGINEER CHONES,
of the Fire Department, who is an expert, has repestedly urge i the adoption of fire-exacts on all
large buildings where numbers of persons are congregated since 1877. No common standard, he
says, has been agreed upon; but speedy legislation
should compel all proprietors of hotels, public
halls, and turiness places to make the best arrengements possible in that direction, and a sense
of justice should actuate the sevent chiefs of the
G-vernment Departments in the same manner. In
addition to fire-escapes, he has saked that all Government Departments in the city should erec i run
ladders reaching from the ground to the roof, kepin position at all times, thus providing a mode of
reaching the roof in time of fire should one occur.
The Chief Engineer citis attention to several
buildings, particularly the Government Printing
Office, where should a fire occur to less of life
would be fearful to contemplate unless fire-escapes
are placed upon it. CHIEF ENGINEER CRONIN, are placed upon it.

THE AMENDMENT RECOMMENDED of such officials as above mentioned. By some hook or crock titls recommendation and amendment has been so changed as to appear in the District appropriation titl in the following shape: "For increasing facilities of escape from fire by stairneaps and down in the several school buildings of the District \$10,000. The Appropriation Committee has evidently been mi-led or overflooked the fact that in the bill as it came from the House \$15,009 was appropriated for "repairs to school buildings and \$85,000 for the erection of new ones." It will thus be seen that ample funds for stairs and doorways had already been provided for. It is to be hoped that the conference committee will recommend to their respective bodies the striking out of the words."

"BY STAIRWAYS AND DOORS," and restore the original language of the bill and the definite object for whice it was intended. It is almost incredible that in view of the official reports already made, that there has been such as aby on the part of law-makers in this vital matter. The commission designate the thin this vital matter. The commission designate by the Senate Commistee of the District of Columbia, adding the Architect of the District of Columbia, adding the Architect of the Tressury, would make such a board as would som mand the confidence of everyone. Congress should appropriate therefor a sufficient sum for the purpose, conside it to their judgment and thus protect the property of the government and guard the lives of its employes. Of what benefit under heavens can extra doors and stairways be to the fire department to assist them in resching the roofs of buildings having pitched roofs, there being no footboil for the firemen, and the majority of the roofs one vast lumber-yard. "BY STATEWAYS AND DOORS.

This may appear but a small reduction, but as the are all standard goods, with best 1800 Linen Boson reinforced, we can vouch for good BARGAINS.

WE HAVE 2,000 OF THOSE

Shirts.

LINEN COLLARS left, which made such a turore for the last twelve months, at 5 cenis, but, as most of them are slightly solled, we have reduced them to 2 cents. They must se sold.

Do not consider this idle talk. Every lady in Washington knows the magnitude of our stock, which, we look as the stock of any other merchant in this city. Therefore, prepare for bargains, as by the lines we move into our NEW HOUSE we expect to reduce the stock to the admits of the city. The goods are all fresh, having sent all our old trash to New York auction to be sold to avoid the lumense rush. Lansburgh & Brother,
